SECOND YEAR.

For if you have friends visiting, or if you are going away on a visit, please drop us a note.

Colonel R. G. Lynn has returned to Cincinnati.

M. S. Dimmitt spent yesterday with his family here.

Mr. John A. Burns of Chicago arrived last evening to spend a couple of weeks with relatives and friends.

E. S. Bowell, State Visitor of the Kentucky Sunday-school Union, was a welcome visitor in our school last week, his home being at Frankfort.

Buckner Wall returned Saturday to resume his studies at Danville after spending Thanksgiving with his parents, Judge and Mrs. Garrett S. Wall.

Howard S. Cady, who spent Thanksgiving with his brother, Will S. Cady, the painter, at Frankfort, returned home on the train that came very near being held up. He had three canons pointed to his head. Ask him about the attempted hold-up.

Miss Elizabeth Kerr and her son, Thomas Kerr, and daughter, Miss Florence Kerr, of Shively, Ky., and Charles F. Chamberlain of Mt. Sterling are here on a visit to the family of the late William Chamberlain. They were here to attend the funeral, which occurred yesterday morning.

LYNCHED.

The Dead Body of a Negro Found Hanging

ATLANTA, Dec. 4.—The dead body of  
Lucius Lott, a negro, was found Sunday  
morning three miles from Concord  
hanging to a tree. Over five hundred  
bullet holes were found in his body,  
the amount of lead in him rendering it  
impossible to carry the body to a wagon, in which he was  
hauled away. The lynching grew out  
of the murder of Arthur Reynolds, com-  
mitted Thursday night. Arthur Re-  
ynolds, a negro, was found dead at 84  
Nierweather across the river from Nine  
County. He went over to Concord  
Thursday evening with a load of cotton  
seed. He sold it and started home. He  
was taken from the wagon, beaten to  
death and buried in a hole he had  
excavated and covered his body with  
the earth. At the preliminary examination Lott  
was declared responsible for the  
tragedy. When the two constables who  
had Holt in charge were within a mile  
of Zebulon, they were surprised to find  
a negro, a man who was in pos-  
session of the prisoner. They told Holt  
that the time had come for him to pay the penalty of  
the crime. He described the murder.  
The relatives, after hearing the  
terrible story, took the man and  
swung him into the air. The crowd  
exhausted the contents of their revolvers  
at the swaying body and dispersed.  
There was a large number of  
Negroes in the lynching party.

NO ANNEXATION

Written by the Hawaiian Native at the  
"Festive Times."

PATRICK J. COONEY, Dec. 4.—Prof. Wili-  
liam Libby has reached Cincinnati after  
a visit to the Hawaiian Islands.

Prof. Libby said he had travelled exten-  
sively and gathered the thorough-  
going sentiment of the natives on the  
question of annexation.

"Popular sentiment," he said, "is  
clearly against political union with the  
United States. I believe the natives  
would return to monarchy if they  
were asked to vote on the question.  
They are not now in a position to  
choose between monarchy and  
republicanism. They believe her treach-  
erous. The dethroned queen is thor-  
oughly mercenary. She was at the  
bottom of the lottery scheme, and has  
outraged the best sentiments of the  
islands by a scheme to legalize the  
the practice of opium.

Mr. Blount is, I believe, thor-  
oughly honest in his reports of the  
sentiments at Honolulu. He should  
have pushed his inquiries to the out-  
er districts, however, would be in  
a position to get at least one-half  
of the 8,000 Americans on the island.  
The people controlling the plantation  
would suffer sadly by annexation, but  
would brook it on contrite labor."

The poor commission estimates that  
there are 12,500 families that will have  
to be supported by charity during the  
winter, and the number will be increased  
by the result of investigation and estimate  
that the number of idle men without  
means is 37,000, with many people in  
addition dependent upon them. Poor  
Commissioner Martin estimates that it  
will cost \$100,000 to support these people  
in care of these people this winter, and  
not more than \$100,000 can possibly be

## THE OLD WORLD.

The Observer's Onslaught on Irish Societies.

The Kossuth Song is Still Causing Much Trouble.

The influenza ravaging Vienna—Fully One Half the Government Forces of Austria Laid Up—Cholera in Italian Royal Palace—Earl of Warwick Dead.

LONDON, Dec. 4.—The National Observer urges that full use be made of the crime act immediately in order to combat the Irish secret societies which, the writer claims are always stirring and which will go much farther than they have gone.

Continuing, the National Observer says: "The Irish police were hampered by want of authority, but the ministry decided to use the secret societies as instruments to subdue the Irish. The members of the secret societies are always stirring and to that end has half defamed the police."

CAPETOWN, Dec. 4.—A dispatch from Fort Victoria says that a force of volunteers sent by President Kruger to liberate a number of women and children whom the Matabales abducted from Port Elizabeth, Mashonaland, months ago, has recaptured all the women and restored them to their people without suffering any loss.

Over 200 King Lebengwa's cattle have been captured and the Matabales are reported to be anxious to surrender.

ROME, Dec. 4.—The wife of one of the official messengers of the royal palace has been attacked with cholera symptoms and she and with her whole family have been sent to hospital.

LONDON, Dec. 4.—The Standard's Berlin correspondent says that two German tramps have been arrested near Orleans in connection with the dynamite outrages.

LONDON, Dec. 4.—Mag. Lamont has sold the Ardmillan estate, the scene of the celebrated Hambrough murder mystery, for \$500,000.

LONDON, Dec. 4.—A Vienna dispatch to the Chronicle says that influenza is spreading rapidly. One of the prominent and sons of the members of the rich aristocracy are prostrated by the disease. The parliamentary sitting has therefore been hastily brought to a close. One-half of the government officers are deprived of their staffs.

LONDON, Dec. 4.—The Earl of Warwick, the owner of Warwick castle, the most marred social effect of the death of the earl is the fact that Lady Brooke, the great favorite of the prince of Wales, becomes the countess of Warwick. The historian, Dr. Foxe, is the oldest son of the late earl. Lord Brooke also succeeds to the income of the Warwick estates, the principal of which is Warwick castle. But the cost of maintaining the castle is very great.

### FAMILY QUARREL.

Results in the shooting of two boys at Santa Barbara, Texas Boys.

NASHVILLE, Tenn., Dec. 4.—At South Pittsburg, Tom Fullum, a rock mason, was beating his wife when a lad, Henry Nelson, the woman's son by a former marriage, came to her rescue.

As Fullum was in the act of striking his wife with a chain, Nelson stabbed him with a pocket-knife. Nelson ran from the house with Fullum and the latter's son and friends. Fullum, but they missed him and struck him on the forehead. The shot glanced and was not fatal. Nelson then surrendered to the authorities.

### A FEMALE BANDIT.

She Hides Up in a Room, and is a Daring Bandit Queen.

HENDERSON, Ky., Dec. 4.—For the past two weeks a female robber on horseback has been ranging Muhlenberg county, in Muddy river bottom, holding up belated travelers, and the mount of a two-story house. She has also plagued two stores in Rochester. All her raids are made after nightfall.

Her frequent depredations have caused several detectives to go on her track. Some suppose her to be insane, while Dr. John Forney, the celebrated victim, asserts her belief that the appearing female is a man in disguise.

Delfino Ready For Death.

SING SING, N. Y., Dec. 4.—Warden Durston has notified the witnesses to the execution of John Delfino, the Brooklyn murderer, to be present to witness the execution at 11 a. m., on Monday, which is the hour set for Delfino to die in the electric chair. The condemned man grows more nervous as the time approaches for him to meet his doom. He is being held for death by Father O'Conor of the Society of the Catholic laity, and is understood to have made a confession to the priest, which will not be made public.

### A Fruity Protest From the Steps.

SAN FRANCISCO, Dec. 4.—The Wholesale Grocers' association of California has passed resolutions denouncing the proposed reduction in the tariff on raisins, figs, and dried fruit, and the proposed bill to agitate the subject. The production of prunes in California this year is estimated at 60,000,000 pounds, raisins 65,000,000 pounds and figs 1,500,000 pounds.

Last of Iron Hall.

INDIANAPOLIS, Ind., Dec. 4.—Judge Winters refused his demand in the iron hall to recover his case. The decision makes permanent the receivership, and orders a distribution of the funds of the order.

Post Office Robbed.

NEWCASTLE, Ind., Dec. 4.—The post office at Clarissa, a village near this city, was robbed by five men, who departed in haste and a shower of bullets fired by the postmaster.

STARTLING INCREASE!  
Insanity Last Year.

The increase of insanity last year over the  
preceding year was startling! I think of it,  
persons suffering from nervous troubles, such  
as sick and nervous headache, nervousness,  
convulsions, neuralgia, apoplexy, dyspepsia,  
epilepsy, &c., &c. The outlook would certainly  
be discouraging for you were there no means of  
escape. Any of these difficulties,  
and many others, are easily removed  
or removed by some other equally deplorable  
condition ending in suicide or premature death.

Dr. Franklin Miles, the noted specialist,  
has treated over 10,000 cases of insanity,  
and of nervous affections, and in the result  
of his labors has only hope of those affected  
with the troublous name. His Restorative  
Nervine is a positive means of relief.  
If you have any trouble with your nerves  
do not wait till your intellect is  
shattered or the frenzy of insanity overcomes  
you. Delay dangerous.

Dr. Franklin Miles, the M. D., chemist,  
and author, writes: "Over-work cannot go to  
break down completely. The effects of over-  
work are not always so serious as to be  
of little good. I could not read or study, and my  
restorative Nervine, Restorative Tonics and Nerve  
Tonic, have relieved me of all trouble, and  
completely cured me. Accept my gratitude for  
the success of your treatment."

There is a legend of the volcano of  
Kilauea, in the island of Hawaii, which  
relates that just before any misfortune  
is to befall the people the goddess of fire,  
Pele, stands before the burning lava and chants a weirdly  
monotonous song. Destruction by fire,  
death or pestilence always follows.

It is a well known fact that the  
Hawaiian song is also suffered from persons  
possessed of the evil spirit. The  
remedies from Dr. Miles' remedies are considered a  
sure and safe remedy for all nervous  
affections.

Dr. Miles' Restorative Nervine is sold by all  
the leading druggists in the country. It  
can be had in bottles for 25 cents.  
Dr. Miles' Nervine and Liver Tonic, 25 cents  
per box. Five boxes, \$1.00. Shipped anywhere.

### BIRDS WITHOUT COLOR.

Those That Sing the Loveliest Songs Are

16 is noteworthy that, in almost every  
race and climate the colors of nocturnal  
animals are dingier and gloomier  
than those of their diurnal allies and  
representatives, says the Cornhill Magazine.  
This difference is due, of  
course, to sexual selection, which  
causes every species of color to appear  
in the darkness. The butterflies, for  
example, are beautifully arrayed; their  
night-flying cousins, the moths, are  
dull-gray or whitish.

Day birds are often decked in brilliant  
colors, like peacocks, toucans,  
macaws and sun birds; the owls and  
nightjars, on the contrary, are dull and  
inconspicuous. Our English swift  
is just an aberrant humming-bird who  
has lost his power of hovering. He  
flies in the northern twilight and grows  
dingier. Most parrots come forth in  
gorgeous red, blue and yellow; but the  
nocturnal New Zealand owl parrot,  
whose name sufficiently proclaims his  
skulking nature, has lost his color, and  
is a pale gray-green, resembling like  
the owl and owl-peacock, and  
so on throughout. A creature so  
brightly colored as the blue-faced  
mandarin or the great bird of paradise is  
always sure to display his features  
of plumage, and to be seen in  
full flood of sunshine, while, conversely, night  
rangers, like bats and rats, wombats and  
bears, are always remarkable for their  
unobtrusive coloration.

One of the most interesting, in which  
nocturnal animals may make an effect-  
ive display to attract their mates, and that is the system of phosphorescent  
flame signals adopted by the glow-  
worm and firefly. It may also be noted  
that an unusually large proportion of  
nocturnal animals have musical voices  
or make loud love calls.

The nightingale and nightjar are  
well-known instances in point in northern  
climates. Visitors to southern Europe  
will find that their cost the tree from which  
they sing and the songster is a  
hawker, while the hawker monkeys,  
the laughing hyenas and the screeching  
lurkers of the forest are equally  
familiar pests to tropical travelers.  
All the nightingale and nightjar are  
vocalists, and sing all night long.

The whip-poor-will and the antbird are  
as common in Massachusetts as the  
cuckoo in England, while the strident  
noises made by the numberless insects  
which rub their legs against their  
sides so as to attract their mates  
are equally well known in many parts of  
tropical America.

A TRAMP'S RENDEZVOUS.  
The City of Denver a Favorite Meeting  
Place.

San Francisco and Denver are the  
main centers of dependence in the  
west. If one meets a westward bound  
beggar beyond the Mississippi, says  
the Century, he may sensibly infer that  
the man is on his way to Denver; and if he  
is found on the other side of that  
city, he may sensibly infer that his  
destination is almost sure to be "Pikes  
Peak" or at least Salt Lake City, which  
is also a popular "hang-out." Denver  
has a rather difficult task to perform,  
for the city is really a junction from  
which tramps start on their travels, in  
various directions, and when the  
people have no means than their share  
of beggars to feed. I have met in the  
city, at one time, as many as one hundred  
and fifty bony-faced tramps, and even  
over one hundred had been in the town for  
over a week. The city is a tramp's paradise, and  
it does not seem to feel the burden of this  
riff-raff addition to the population; at any  
rate, they befriend it most kindly.  
They seem especially willing to give  
money to those who have none.

I knew a kid, or "up-sheep," who  
was vagabond in Denver nearly three  
years a day for almost a week, by  
standing in front of shops and "battering"  
the ladies as they passed in and out.  
He was a handsome child, and this,  
of course, must be taken into consideration,  
for his success was really phenomenal.

The Case on His Travels.

No tramp is more popular in Denver  
than the one, although this  
is not the case in the city, which  
consists of no fewer than three  
hundred large trunks, exactly twice  
the number of those used by the  
princess of Wales and her daughters, which  
fill footmen's rooms, and the  
trunks are entirely devoted to  
imperial presents, which are distributed  
with extraordinary liberality. A  
large sum of ten thousand francs is  
distributed among the Fredensborg  
servants, and Danish footmen, or  
of all grand dukes and duchesses by various  
ambassadors, and ribbons of Stanislaus and  
St. Anne. Diamond rings reward the  
loyalty of the police, while gold  
watches and chains of considerable  
value are bestowed on the telegraphers  
and station-masters. The emperor  
always causes a large sum of money to  
be given to the poor of Fredensborg.

A True Goldfish Story.

At the New York hospital they  
repeated a curious occurrence, which  
was the hibernation of fishes. In the  
conservatory in the upper part of the  
building they had several glass jars in  
which were goldfish, which is a species  
of carp. One morning the carer  
found a jar broken, and the water  
had run out, though the glass, the fish,  
of course, being as rigid as ice. The  
lump was taken away and thrown into  
an old rubbish barrel. On March  
the day the sun was unusually strong, and  
it split the cylinder, but not  
the glass, and the water ran out  
again. The carer took the glass  
out and the fish were still alive.  
The carer was surprised at this  
and during that time was unable to  
explain it. The carer then asked  
the conservatory director, Dr. Nervine,  
what was the cause of the fish's  
survival. Dr. Nervine said that he  
had a power of making glass  
impermeable to water. He  
had a glass cylinder which  
he could not fill with water, as  
it would not penetrate the  
glass.
